

should I add dstart date
and point?

Not sure if i want to track how many snack
was sold during which movie and what time
most snacks are soled?

1- One customer can buy
multiple tickets, but each ticket
only can be associated to one
customer, so one to many
relationship.

Ordinality- Customer can be
exist without buying tickets, for
instance customer migh be
there just to get snack or drink.

2-One movie can have multiple
tickets, but ticket can be used
only for one movie. Ordinality-
Movie will be exist without ticket.

3- Customer can buy many or
none snack.
